State Aid	116	0	116	0	0	0	0	0	0	0	0

ANNUAL OPERATING BUDGET IMPACT (\$000)

DESCRIPTION

This project provides an upgraded storm drain system to replace an inadequate, deteriorated existing terra cotta pipe system. The project will include new inlets, pipes, and necessary street and sidewalk repairs.

Capacity

The design is based on the ten-year storm frequency interval.

Plans and Studies

In 1994 officials of Chevy Chase Village alerted the Department of Public Works and Transportation that a large sink hole opened up under the existing sidewalk on Primrose Street. An investigation revealed that the existing pipe has partially collapsed. Although temporary repairs have been made, the pipe must now be replaced and properly relocated to a public right-of-way or easement. After a meeting with the Maryland State Highway Administration (MSHA) and the Chevy Chase Village Town Manager, conceptual plans were initiated. A pedestrian impact analysis has been completed for this project.

STATUS

Under Construction

OTHER

The engineering concept plan for this project was initiated under the Neighborhood Storm Drain Repairs project. Since the new system will involve some connections to the existing MSHA system in Connecticut Avenue and street repairs to the roads maintained by the Village, a participation agreement between the County and the other two jurisdictions has been developed. Funding shown under "State Aid" is MSHA's contribution. Financing shown under "Intergovernmental" is from Chevy Chase (currently estimated at \$33,000). Construction is scheduled to start in FY 06 and be complete in FY07. Lengthy negotiations in the property acquisition process have resulted in a schedule delay. The start of the one year construction period has been delayed to FY06.

APPROPRIATION AND EXPENDITURE DATA		
Date First Appropriation	FY05	(\$000)
